

Nut Float Tank Stone Separator – BAP

This device separates the nuts (or hazelnuts) from the stones and the bad chestnuts from the good ones.

Suitable crops

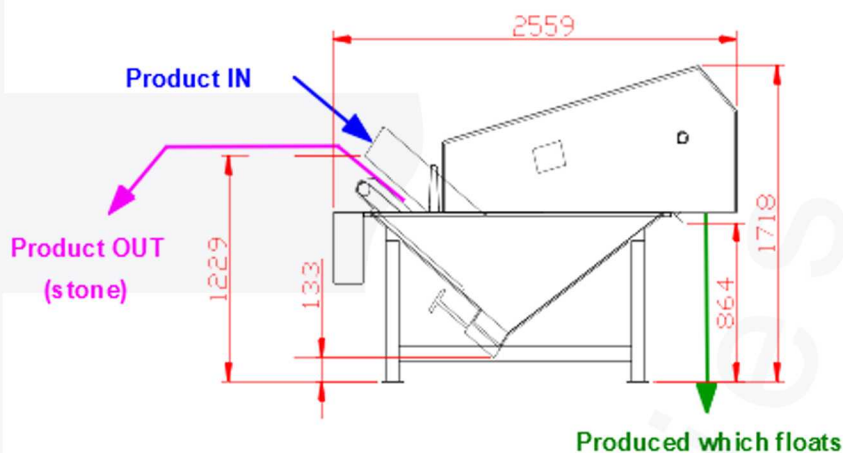

Walnut

Hazelnut

Main Features

- Deep reservoir holds even heavy nuts from rock belt disposal
- Large and quick drain valve
- Easy access to bearings and axles for maintenance and repairs
- Unattended operation
- This device separates any nuts from stones

TECHNICAL CHARACTERISTICS

Motor: Three-phase electrical moto-variator 0,25 kW - fixed speed
Three-phase electrical moto-variator 1,10 kW - fixed speed
Continuous water level

Frame: Mechanical-welded painted fully protected under casing

Length: 2.55 m

Width: 1.05 m

Height: 1.71 m

Weight: 525 kg

Flow: 8 m³ nuts fresh/hour

Water consumption: 0.3 m³/hour

Options: Raise 250 - 500 - 1 000mm
