

## **Reserving hopper TK3 For emptying the trailer**

### **Technical specifications**

- Very robust painted welded frame
- Mounted on 4 self-aligning bearings
- Three-phase gear motor with variable speed (0.55 Kw)
- PVC belt width 500 mm
- Hopper 2.50 m galvanized folded bolted

### **Operation**

- Hopper with inclined belt of 3 m
- By PVC conveyor belt, width 500 mm
- Adjustment of the belt tension
- Adjustment of the belt speed by mechanical variator
- The 2.50 m wide hopper allows the emptying of a trailer
- Possibility of an extension of 1 m to feed a screen

### **Weight and dimensions**

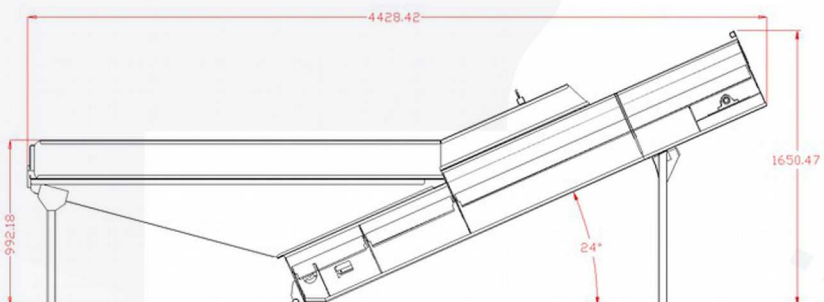

- Length: 4.42 m – 5.34 m (version with extension)
- Width: 0.70 m (0.85 m with the engine)
- Height: 1.65 m – 2.05 m (version with extension)

**Suitable  
crops**

### **Version standard**

### **Version with extension 1 m**
